

March 27, 2017

Florida Senate President Joe Negron  
305 Senate Office Building  
404 South Monroe Street  
Tallahassee, Florida 32399

Dear Senator Negron,

Due to recent claims you have made at public forums, the undersigned landowners in the Everglades Agricultural Area (EAA), which represent landowners that own more than 2,500 acres of land in that region, are banding together and reaffirming that we are not willing sellers of our property to the government.

Over the last two decades, farmers south of Lake Okeechobee have lost more than 120,000 acres of productive farmland to the government and the undersigned landowners are not willing sellers of any more.

Instead, EAA farmers will continue to advocate for plans that will show real results for Florida's environment.

Sincerely,

U.S. Sugar
